

NOTICE TO RESIDENTS

**FROM THE VILLAGE OF ROCHESTER –
PUBLIC WORKS COMMITTEE**

April 30, 2009

The Village is preparing construction plans for a sewer improvement project to increase the capacity of the sanitary sewer line that parallels the Black Branch Creek from East Main Street to the Northeast Pumping Station. The sewer project is required to meet the increased sewer demand created by the proposed new east side Rochester Intermediate School facility.

The Village is hosting a public information meeting about the project at 6:30 PM on **May 12, 2009** at the Village Hall. Project details, such as the proposed replacement alignment, sewer capacity, design schedule and anticipated impacts to residents will be presented at the meeting. The Village Engineer, staff and members of the Board of Trustees will be available to review, hear comments and answer questions about the sewer improvement project.

The public is invited to attend and hear about this much needed project. If you have any questions, please call the Village office at 498-7192.
